## Posting Pics from Photobucket

Once you have your Photobucket account created go to the Library page and click on the round Profile icon in the upper right corner of the page. A drop down box will appear. Click the settings tab.

In the settings window click the Albums tab...

Librar	y Browse E	Editor U	pload	Print Shop	l			
Home Decor	Photo Books	Calendars F	hoto Gifts P	hone & Tablet Case	es Prints	All		
Personal Information								
Personal	Albums	Privacy	Apps	Notifications	Mobile	Account		

In the Albums window ensure the following are checked... then scroll to the bottom and click the SAVE button.

## Albums

Personal	Albums	Privacy					
Thumbnail Settings Sort order for new albums							
Newest first							
Sort all existing albums the same way							
Image Rotatio	on						
Automatically rotate images on upload							
Links Show these sha ✔ Email & IM	are options for all	l of my albums.					

- 🖉 Direct Link
- HTML code
- HTML thumb
- IMG code

Now in the top left of the page click Library to return to your main library to begin loading Pics from your PC into Photobucket. Once they are there, they should look similar to this...

/

The IMG code is the one you want to copy and paste into your FiberGlassics post. Just click in the window to select and highlight it then right click it and a pop up window will appear...

Copy Search Google for 'IURL=http://s1018.photobucket.com/user/'	Ctrl+C
Print	Ctrl+P
Inspect element	Ctrl+Shift+I

Left click on Copy and you can return to your Fiberglassics thread and Paste the code directly into your thread and the pic will appear.
